

Engineer IV- Senior IT Specialist (Microsoft)

Number of positions: 1

Title: Senior IT Specialist (Microsoft)

Customer: Intelligence Community Customer

Location: Ft Meade

Travel: None

Clearance: TS/SCI

Position Description

This project needs professionals who are committed to making a positive impact on our Ft Meade customer. If delivered correctly, the services we provide will change the way many in the community conduct their business. The successful candidate must be able to support senior level decision makers by providing Microsoft Professional Services and technology solutions in areas that can include Microsoft O/S, SharePoint, SQL server as well as personal computer/client server support, systems programming, applications design and development, database design and administration, telecommunications and network support and administration.

Minimum/General Experience

Must have at least 8+ years of general experience in the Information Technology field, and possess at least 5 years of Microsoft specific technologies experience either as a Senior Systems Administrator, Architect or Applications support engineer. Must be able to work with a variety of Microsoft technologies and vendor applications and must understand network topologies and protocols. Successful candidate must also possess substantive knowledge of Active Directory, SharePoint and MS SQL Server technologies.

Functional Responsibility

Successful candidate must have broad understanding of how Microsoft products work together and be able to explain to the organizations customer what technical and cost benefits can be realized during and after integration. Additional broad knowledge of VMWare technology, IIS hosting and .NET applications is desired.

- Successful candidate must have experience with MS Server 2003 and 2008
- Experience with MS SQL Server 2005 is required
- Candidate must also have a high level of expertise with Active Directory
- Must have a solid knowledge of utilizing TCP/IP in a LAN/WAN environment.
- Must understand DOD security policies and procedures and either possess or be able to pass Security+ Certification within 60 days of hire
- Candidate MUST possess advanced interpersonal skills, excellent written and spoken communication skills, project professionalism in all aspects of personal appearance and customer interaction and must have proven experience interacting with, briefing and advising SES level government customers.

Minimum Education

Bachelor's degree required and appropriate industry recognized professional certifications are highly desired. Requires minimum 8+ years of general experience in the Information Technology field, and possess at least 5 years of Microsoft specific technologies experience.
